Experiment

- I paid \$4,662 for 2,331 respondents with Lucid and \$168 with MTurk. I can spend MTurk whenever I want. Lucid will wait for my go-ahead to launch the actual project

Structure outline

- Structure everything around surveys/measurement/ordinal variables, just like in my Kerwin proposal
- Paper I is the ordered probit threshold approach for blocking on ordinal variables
 - Simulations
- Paper II uses the paper I thresholds to adapt multiple hot deck imputation of missing data for ordinal variables
 - Simulations
- Paper III applies paper I and II methods in an online survey experiment on the potential importance of moral arguments for frame strength
 - MTurk for pre-testing
 - Survey experiment

Committee

- Liz has input on framing and is fine with the methods part
- Not much yet from Mike

Ordinal blocking

- `ordered_outcomes_modeling`
 - Do Monte Carlo simulations
 - * Read through the resources Jeff sent me

Ordinal missing

- Code
 - Email Jeff

Framing

- Reworking things
 - Go through Liz' email
