Theory

- Entropy: What is the difference? What is ‘more entropic’ than the other, and what does that mean? What’s the point Homola et al. make?

General

- It looks like this isn’t workable. I can’t afford a phone survey. Plus, it’s doubtful whether this entropy stuff was such a great idea to begin with
- There is a very slight possibility that this might still be salvageable through NORC with Angela (contact made by Natalie)
- This turned out to go nowhere; I never heard from her again. Leave it be and find something else
