

Project Description (10 pages max.)

- Scientific significance of the work
 - Relationship to other current research
 - Design of the project in sufficient detail to permit evaluation
- Present and interpret progress to date if the research is already underway
- Clear descriptions of relevant literature and theoretical frameworks within which the project is set
- Complete description of the research methods that will be used
- Discussion of the expected intellectual merit and broader impacts that may result from the project
- Include Research Schedule
- Include date that funds are required
- If the PI or Co-PI has had NSF funding within the last three years, information regarding that funding may be included as an additional 11th page
